B.Sc in Informational Systems

2019-present [Innopolis University](#)
B.Sc in Computer Science

Languages

English (intermediate, IELTS overall 6.0), Russian (native)

About me

High result achiever. I'm interested in new technologies. I like to read a professional literature. I've participated in a lot of programming competitions. Also I always try to find the best application for my knowledge and my skills.

Key skills

I've worked with next technologies, APIs and web-frameworks: RabbitMQ, SOAP, Docker, Spring, Java Persistence, Laravel, OctoberCMS, ZeroMQ and WAMP protocol.

Programming skills

In 8th grade I started to learn Python programming language by my own.

I have developed an amateur Android applications. First time when I tried to develop them I used an Embarcadero Delphi developing software. Some time later I started to use Android SDK with Java.

I've listened to an online Machine Learning course from the professor of Stanford University by Coursera online service.

I've participated on Hackday hackathon in Almaty city. On this hackathon I've cooperated with my friends and we made a solution on one problem of industrial programming. In this solution I've used Machine Learning.

In 10th grade I made a website for my school using OctoberCMS and Bootstrap frameworks. Also, when I worked on it, I've modified an open-source template.

At the 2017 summer's I tried to develop some amateur games.

In 2018 I participated in Method PRO internship and I won the final hackathon of this internship. During this internship I was part of the team of developers, who made an Android application and Web-site for Technodom's "Digital book of complaints and suggestions" case. After that, I've started to work at Technodom Operator JSC.

Interests

Reading fantastics, science literature such as psychology. Sometimes, I may play computer games, develop small startup projects or web/android applications to improve my own life.
