B.Sc in Informational Systems

Languages

English (Upper-intermediate, IELTS overall 6.0), Russian (native)

About me

I am a high achiever with a strong interest in new technologies. I enjoy reading professional literature and have participated in numerous programming competitions. I always strive to apply my knowledge and skills in the best

possible way. Also, I always try to find the best application for my knowledge and my skills.

Currently, I own a small homelab where I experiment with some technologies such as Tailscale, Proxmox, and developing my own solutions for DNS and DHCP, along with other projects to improve my life.

Key skills

I've extensively worked with a lot of technologies, for DevOps and programming purposes.

Interests

I enjoy reading both fantastic and scientific literature. I also occasionally play computer games and develop small projects to enhance my life.
